

NUR'AMIRAH ABDUL RAZAK

Jasin, Melaka • +60138395932 • myrarzak@gmail.com • www.linkedin.com/in/myrarzak-37b06640a

PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Multimedia Computing, combining a solid technical foundation in network engineering with advanced expertise in UI/UX design, interactive media development, and full-spectrum 3D/VR environment creation. Proven track record of delivering cross-functional technical support and digital solutions, demonstrated through an IT networking internship at UTeM and tech-sector retail experience. Proficient in Figma, Unity, Three.js, Blender, and web programming, with a strong academic background in IoT integration and computer networks. Aspiring to leverage creative multimedia engineering, object-oriented programming, and technical problem-solving skills to design high-impact digital experiences for forward-thinking organizations.

TECHNICAL SKILLS

Programming & Frameworks:	JavaScript, Python, C#, Three.js, Web & Mobile Application Development
UI/UX & Interactive:	Figma, Wireframing, Interactive Prototyping, Narrative Architecture & Storytelling
3D, AR & VR Tools:	Unity, Blender, Augmented Reality (AR), Virtual Reality (VR) Environment Design
Networking & Hardware:	Cisco Routers & Switches, LAN/Wi-Fi Infrastructure, Packet Tracer, Wireshark, LAN Cabling, IoT Hardware Integration
Software & Databases:	Visual Studio Code, Microsoft Office Suite, Firebase

PROFESSIONAL EXPERIENCE

Universiti Teknikal Malaysia Melaka (UTeM)

08/2022 – 12/2022

IT Networking Intern

- Configured and optimized campus-wide network hardware, managing routers, switches, and wireless access points to ensure stable network infrastructure.
- Resolved localized LAN and Wi-Fi connectivity issues, providing rapid technical support and minimizing downtime for campus users.
- Executed critical hardware deployment and physical infrastructure upgrades, including server room network cabling, patching, and installation.
- Partnered with senior network engineers to map and document complex network topologies, IP addressing schemes, and system configurations for future troubleshooting.

Gadget Store (Xiaomi/Redmi)

03/2023 – 09/2023

Sales Specialist / Retail Worker

- Translated complex technical specifications of Xiaomi and Redmi ecosystems into user-friendly product recommendations, consistently hitting daily sales targets.
- Leveraged targeted communication to analyze consumer needs, address hardware/software inquiries, and upsell interconnected IoT consumer technologies.
- Managed real-time inventory tracking and product displays, minimizing stock discrepancies and accelerating product knowledge acquisition.

PROJECTS

"Ngopi" Interactive AR Mobile Application

In Progress

Overview: Immersive, interactive Augmented Reality (AR) multimedia mobile application designed to enhance user engagement.

Technologies: Unity, Blender, Figma, Visual Studio Code, Firebase, C#

- Architecting the end-to-end user experience by wireframing interfaces in Figma, modeling custom 3D assets in Blender, and scripting interactive object behaviors within Unity using C#.
- Resolving asset-optimization challenges to ensure seamless AR rendering and stable Firebase backend database integration.

"The 3rd Eye" IoT Smart Walking Stick

Completed: 2022

Overview: Innovative IoT-enabled smart walking stick designed to assist visually impaired individuals with real-time obstacle detection.

Technologies: IoT Hardware Integration, Python, Ultrasonic Sensors, Wireless Connectivity Components

- Engineered the hardware integration framework, utilizing Python scripting to process ultrasonic sensor signals and trigger wireless communication components for low-latency obstacle alerts.
- Overcame physical prototyping constraints to deliver a functional, high-utility accessibility tool.

EDUCATION

Universiti Tun Hussein Onn Malaysia

Expected Graduation: 2027

Bachelor of Computer Science (Multimedia Computing) with Honours

Relevant Coursework: UI/UX Design, Multimedia Development, IoT Hardware Integration, Computer Networks

Politeknik Muadzam Shah

Dec 2019 – Dec 2022

Diploma in Networking Technology

Relevant Coursework: Computer Networking, Routing and Switching, System Administration

AWARDS & ACHIEVEMENTS

- Best Student Award (2023):** Received highest academic honors for outstanding excellence during the 2023 Diploma Graduation ceremony.

LANGUAGES

- English:** Professional working proficiency
- Malay:** Native proficiency
